

DIEGO VAZQUEZ

Senior Software Engineer

Phoenix, AZ | (602) 317-1162 | vazquez.diego59@gmail.com

SKILLS

Languages & Runtimes: JavaScript (ES6+), TypeScript, Node.js, Java, C#

Frontend: React, Next.js, React Native, Angular, Redux, Zustand, TanStack, Tailwind CSS, Chakra UI, Bootstrap

Backend: NestJS, Express, WebSockets, RESTful APIs

Testing: Jest, Cypress

DevOps & CI/CD: Docker, Docker Compose, GitHub Actions, Azure DevOps Pipelines, Jenkins

Databases: PostgreSQL, MongoDB, MySQL, SQLite

EXPERIENCE

Senior Engineer *September 2025 – Present*

Plexus Worldwide — Phoenix, AZ (On-site)

- Improved product discovery on plexusworldwide.com by building OpenSearch-powered search and breadcrumb navigation in React and Next.js, contributing to higher purchase conversion rates
- Built Node.js/NestJS backend services that ingest Contentful CMS content, transform it into a consumable API, and index it in OpenSearch to power site search and content delivery for the frontend
- Own the legacy Angular 9 checkout and cart applications, implementing new features alongside ongoing support

Senior Full Stack Engineer *March 2022 – June 2025*

Lightbox — Phoenix, AZ (Remote)

- Developed scalable Node.js backend services with WebSocket integration to stream and process large geospatial datasets in real time, handling 60K+ records per map region
- Refactored core mapping features from Leaflet into modular React components, enabling reusable map layers and hooks across the platform
- Converted Figma wireframes into reusable React components using TypeScript and Tailwind CSS
- Built optimized Docker images and Docker Compose workflows integrated into GitHub Actions pipelines to automate build, test, and deploy

Full Stack Engineer *November 2021 – March 2022*

Carvana — Tempe, AZ

- Developed internal React/TypeScript applications in an Nx monorepo to streamline the IRC team's transition to new vehicle-repair workflows
- Built React Native applications for Zebra handheld devices, converting design mockups into production features used daily by warehouse workers across Carvana facilities
- Set up Azure DevOps CI/CD with YAML pipelines so every commit runs automated tests before deploying

Full Stack Engineer *October 2019 – November 2021*

American Express — Phoenix, AZ

- Architected and developed end-to-end React applications to streamline the launch and management of new card campaigns, primarily for the Platinum Card
- Supported the David Jones Platinum Card team by managing React routes and implementing One AMEX framework components to streamline user flows
- Converted wireframes into applications using the One AMEX framework and Design Language System (DLS)
- Implemented and maintained Jenkins CI/CD pipelines for production deployments; monitored releases with Splunk

Full Stack Engineer*October 2018 – October 2019*

Digital Airstrike — Scottsdale, AZ

- Built internal B2B management tools using React, HTML/CSS, and MongoDB
- Integrated Auth0 single sign-on, supported C# backend services, and deployed through Azure Pipelines in an Agile/Jira environment

Software Engineer*June 2016 – September 2018*

American Express (Syntel contractor) — Phoenix, AZ

- Delivered user stories using React, Node.js, Redux, SASS/CSS, and HTML in an Agile environment, advising teammates on frontend best practices
- Created and consumed RESTful web services using Java 8, Spring, Maven, and JBoss; deployed and supported releases via Jenkins

PROJECTS

Real-Time Multiplayer Duel Engine — *Node.js, uWebSockets.js, Zustand, Zod, Docker*

- Designed a card game duel server with persistent WebSocket connections that spawn isolated worker processes per match
- Built a Zod-validated message protocol for type-safe client-server communication over uWebSockets.js
- Containerized native FFI dependencies (Koffi) with Docker, resolving cross-version Node.js build and linking issues

EDUCATION

Bachelor of Science, Computer Science*2016*

Arizona State University — Tempe, AZ
